LIFTING AND MOORING SOLUTIONS

## Quik Safe Connector - QS-400

The QS connector is made to be used together with a remote operated deck handling system. The connector can also be used manually with existing deck tools for open and closing kenter shackles.

When the connector is pulled onto deck and the load is taken off, the connector will remove any twist in the wires.

- ❖ The QSC connector are also built to be spooled into the vessel wire compartment
- ❖ Can be operated manually as well as automatically

## Specification
