MultiDog Insert Receptacle - FMI-3R

FMI-3R is a special tool made for the after market. The receptacle can be used for removal of offshore installations or salvage operations.

The FMI-3R tool is equipped with project specific mechanical wedges or grips that fix the receptacle to the object.

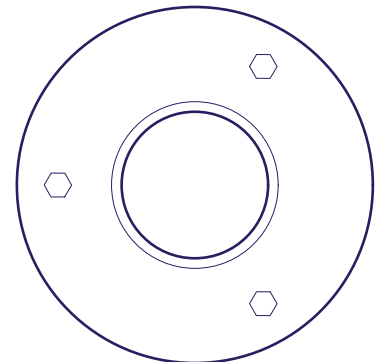

The receptacle adapter can be prepared on deck and installed subsea by ROV.

Specification

Capacity: Custom design

Dimensions: Custom design

To be used together with LC-3R male connector.

The field proven MultiDog connector combines state-of-the-art material technology with reusable rugged lightweight construction to save time and money during subsea installation and recovery operations
